

DIGITAL PRINTING QUALITY INSPECTION SYSTEM

Digital Printing Quality Inspection System uses a high-resolution line-array camera to take images of the products to be inspected online. The image is analyzed by the self-developed image processing software, the detection results are displayed in real time, and the high-speed elimination device is used to ensure the defective products are discharged accurately. It has the advantages of real-time, efficient and accurate.

SUZHOU SLAC PRECISION EQUIPMENT CO.,LTD

No.1028,Sunwu Road,Xukou Town,Wuzhong District,Suzhou,Jiangsu Province,China

Tel: 0086-512-66930111

Fax: 0086-512-66248543
